

VIJAYAKUMAR M

Frontend Developer (Wordpress & Reactjs)

+91 7708500704 mvijaykumarpbt@gmail.com Indira Nagar, Bengaluru - 560075

SUMMARY

Frontend Developer with one year of hands-on experience in designing and building responsive, user-friendly websites. Proficient in HTML, CSS, Bootstrap, Tailwind Css, JavaScript, and React.js, with a solid understanding of frontend development principles. Skilled at creating and managing WordPress sites and transforming creative ideas into functional web solutions. Committed to continuous learning and growth in the field to deliver high-quality digital experiences.

PROFESSIONAL SKILLS

- HTML
- CSS
- Bootstrap
- Tailwind Css
- Javascript
- ReactJs
- NodeJS
- Wordpress
- MongoDB
- ExpressJS
- Windows Server
- AWS

WORK EXPERIENCE

FRONTEND DEVELOPER WORDPRESS & REACTJS

(Oct 2023 - Present)

Globussoft Technology

- Using the Reactjs Context API and hooks to control data flow and application state, state management strategies were put into practice, guaranteeing smooth and consistent user interactions.
- In order to manage asynchronous processes and optimize data flow for performance, RESTful APIs were integrated to get, update, and display dynamic data within the application.
- To keep the codebase neat and manageable, I worked with other team members via pull requests and code reviews, and I used Git and GitHub for version control.

SYSTEM ADMINISTRATOR

(Jan 2021 - Jun 2023)

Stellar Innovation Pvt.Ltd

- Install, set up, and maintain server hardware and Windows operating systems to guarantee optimum security, stability, and performance.
- To preserve data security and control over sensitive information, create, manage, and remove user accounts, permissions, and access privileges.
- Maintain high availability and minimize downtime by routinely tracking possible problems, keeping an eye on system performance, and putting preventative measures in place.

TECHNICAL SUPPORT TRAINEE

(Dec 2018 - Jan 2021)

Satvat Infosol Pvt.Ltd

- In order to guarantee optimal system performance, hardware problems were identified and fixed, including CPU repairs, RAM upgrades, and other component replacements.
- Computer systems were put together and configured in accordance with specifications, managing the wiring, component installs, and functional testing.
